PROFESSIONAL EXPERIENCE

DATA ANNOTATION TECH

AI Chatbot Prompt Engineer

May 2023–Present

- Contributed to the creation and curation of prompt sets used for AI training and evaluation.
- Coordinated with other contractors and team members to produce a diverse range of prompts to effectively train the AI system.
- Adhered to data privacy and ethical guidelines while creating prompts and analyzing chatbot responses.
- Participated in regular feedback loops, analyzing chatbot responses and providing corrections to improve accuracy.
- Provided constructive feedback to the platform about potential improvements to the interface, task design, or general workflow.

PANTHEON SYSTEMS, INC. (B2B SaaS)

Software Engineer Intern

June 2022–August 2022

- Built and shipped library migrations, dependency upgrades, and feature additions to our customer-facing dashboard.
- Participated in all aspects of the cross-collaborative Agile process including standups, A/C reviews, and sprint retros.
- Worked on a front-end team on a tech stack including React, GraphQL, JavaScript, and various 3rd-party React libraries.
- Utilized CI/CD practices through incremental code changes utilizing CircleCi and Github team collaboration.
- Participated in UX Research meetings to help identify customer pain points and potential workarounds.
- Improved modernity of dashboard by upgrading critical breaking dependencies, allowing for improved user security and dashboard stability.
- Modified dashboard view utilizing design system components to provide opt-out capabilities for customers. Enabled local storage save and deleting persistent caches.
- Performed code edits to company design system files and tests to remove linting.
- Refactored code to prepare for migration from Reach Router to React Router.
- Utilized Jira to write, track, and manage tickets.
- Thrived during company reorganization. Moved from product growth to front-end architecture team and switched focus and work projects with composure.

EDUCATION

WESTERN GOVERNORS UNIVERSITY

Bachelor of Science in Software Engineering

August 2024
Degree in Progress

TECH ELEVATOR JAVA FULL-STACK BOOTCAMP

Completed a 14-week full-stack coding boot camp exploring how to create robust web-based software systems using Java, JS, SQL, and APIs, benefiting from 700+ hours of development education and application.

January 2022- April 2022

TECHNICAL EXPERIENCE

OUTDATED EDUCATOR - WEB APP LEVERAGING OPENAI GPT

Personal OpenAI GPT API project

August 2023

- Flask, Python, JS, and API technologies enable a web app that provides outdated facts from your graduation year.

MOVIE RECOMMENDATION CHATBOT

Personal Data Analysis/Visualization Project

June 2023

- Utilized Python and Jupyter Notebooks to implement a chatbot that recommends movies based on user-selected genres.

HOMESCHOOL HAVEN - A HOMESCHOOL ASSIGNMENT AND TIME TRACKER

HackMerced Hackathon 2022 - Winner: Best UX/UI Design

March 2022

- Conceptualized a data tracker for streamlined homeschool logistical record-keeping of 10+ metrics, implementing Grunt, Sass, and other node.js packages.
